

LAKE ZURICH HIGH SCHOOL SUMMER SCHOOL 2011

Dr. Michael Egan, Lake Zurich CUSD 95 Superintendent

Mrs. Kim Kolze, Lake Zurich High School Principal

Mr. Eric W. Hamilton, LZHS Summer School Principal

Mrs. Pollie Greenhalgh, LZHS Summer School Secretary

For more information, contact Lake Zurich High School

(847) 540-4102 or (847) 540-4112

PROGRAM INFORMATION

District 95 will be offering two sessions of semester credit to grades 9-12. All summer school classes will take place at Lake Zurich High School. The Lake Zurich High School Summer School Program is self-supporting. Therefore, we reserve the right to cancel any class that does not meet minimum enrollment guidelines.

The dates for Summer School are:

Session I: Monday, June 13 – Thursday, June 30, 2011

Session II: Tuesday, July 5 – Thursday, July 21, 2010

Summer school classes will be held **Monday-Thursday from 7:30 a.m. until 12:30 p.m.** The only exceptions are Driver's Education Classroom and Study Skills. (7:30 a.m. – 10:30 a.m.)\

**Due to the July 4 holiday, the first week of Session II will run Tuesday through Friday.*

ELIGIBILITY

The program is open to all district high school students and incoming freshman. Out-of-district students should check with their respective schools to see if credits are transferable. Eligibility for the Driver's Education Class and Behind-The-Wheel instruction is set by Illinois State law, which is defined in the Driver's Education section of this brochure.

TUITION

The tuition fees for summer school are as follows:

- \$180 per semester course for in-district students
- \$255 per semester course for out-of-district students
- \$75 for Study Skills
- \$100 for Driver's Education Classroom (in district)
- \$150 for Driver's Education Classroom (out of district)
- \$300 for Behind the Wheel

Please make all checks payable to Lake Zurich High School. Some courses may require additional costs for supplies. Due to the summer school program being self-supporting, scholarships are not available.

TRANSPORTATION

Transportation is not provided for the high school summer school program.

EVALUATION

Students who are taking courses for credit will receive the same type of grades as given during the regular school year. Grades received for semester courses will be counted toward graduation. Final exams will be given in all classes at the end of each session.

ATTENDANCE

Students should not elect to participate in the summer school program if family vacations, summer camps or other activities have been scheduled. One day in summer school equals five days in the regular school year. Because curriculum is condensed and coursework is concentrated, summer school requires prompt student attendance.

1. A student will be dropped from summer school if he or she accumulates two days of absence, excused or unexcused, in any class.
2. A tardy of one half hour or less is recorded as one-half day absence; more than one half hour equals a full day.
3. Attendance on the last day of summer school is mandatory. A student who is absent on the last day of summer school may not take the final examination, will not receive credit, and will forfeit all fees for the semester.
4. Students dropped from summer school do not receive refunds.
5. To report an absence or ask a question, please call the summer school office at 847-540-4102.

REFUNDS AND COURSE CANCELLATIONS

There will be no refunds once classes begin, unless a course is canceled. Prior to that date, a request for a refund should be submitted to the Summer School Office, Lake Zurich High School, 300 Church Street, Lake Zurich, Illinois 60047. The Lake Zurich High School Summer School Program is self-supporting. Therefore, we reserve the right to cancel any class that does not meet minimum enrollment guidelines.

Courses may be canceled if there is insufficient enrollment.

REGISTRATION

You should receive a Summer School Registration Form (also found in the back of this brochure) during the upcoming year's course selection process. The completed form should be mailed to:

**Summer School Office
Lake Zurich High School
300 Church Street
Lake Zurich, Illinois 60047**

Upon receipt of the registration form, the summer school office will contact you to arrange for the tuition payment. Additional registration forms are available in the high school main office or on-line. All classes are on a first-come, first-serve basis, which is determined by the date the registration form is received by the Summer School Office. **No phone registrations will be accepted.**

COURSES TO ADVANCE IN CREDIT

Registration for summer school will occur during the upcoming year's course selection process. You should complete the summer school registration form when you register for the upcoming year's courses.

The dates for courses to advance in credit are:

Session I: Monday, June 13 – Thursday, June 30, 2011

Session II: Tuesday, July 5 – Thursday, July 21, 2011

Summer school classes will be held **Monday-Thursday from 7:30 a.m. until 12:30 p.m.** The only exceptions are Driver's Education Classroom and Study Skills. (7:30 a.m. – 10:30 a.m.)\

**Due to the July 4 holiday, the first week of Session II will run Tuesday through Friday.*

APPLIED ARTS

Consumer Education - College Prep – Graduation Requirement

Semester Course – Session I or Session II

**Students must have completed their sophomore year in high school to enroll.*

The objective of this course is to give the student a sound understanding of the marketplace and how to function in it as a wise and thoughtful consumer. Students will learn the free enterprise system, advertising, management of the buying process in the marketplace, dealing with sales people, money management, consumer rights, insurance, credit, banks and managing you own checking account. This semester course is a graduation requirement.

ENGLISH

Creative Writing – College Prep - Semester Course – Session I or Session II

**Students must have completed their freshman year to enroll.*

Creative Writing is a semester course for the imaginative and creative writer. Required student writings will take the form of poems, short stories, non-fiction, and plays. Classroom discussions will focus on the evaluation of published writings of professional authors, an examination of the use of literacy devices in writing, and workshops that examine and critique the writing of classroom participants.

Journalism 1 – College Prep - Semester Course – Session I

Journalism 1 is a course in written and oral communication designed to build strong writing, editing, and speaking skills for students of all age and ability levels. Students survey all aspects of print journalism, from legal and ethical issues to myriad writing forms to photography and design. Students also discuss current events and media's role in society.

FINE ARTS

Art Foundations – College Prep – 1st Semester – Session I

There may be additional costs for supplies. The student is responsible for the supplies.

Art Foundations provides studio experience in diverse media, styles, and techniques. Art history is integrated within the course of study to provide an artistic understanding of the media studied. Art Foundations emphasizes the study of both 2-D and 3-D work.

Digital Photography I – College Prep – Semester Course – Session I or Session II

Prerequisite – Art Foundations

There may be additional costs for supplies. The student is responsible for the supplies.

Digital photography will explore concepts, techniques, and possibilities within digital photography. Students will explore the digital process, the camera, aesthetic principles, composition, and the history of photography. The course will also cover the use of Photoshop software for image corrections, inkjet printing, and achieving special effects in the computer. Students will be required to acquire digital image files in one of two ways: using a digital camera with a USB connection or taking photographs using a traditional film camera and developing film at a commercial lab.

MATHEMATICS

Transition to Geometry Honors – Session I only (*this is a non-credit, enrichment course*)

This course is designed for the above-average math student that is recommended for Geometry Honors and would like enrichment to prepare for the course. The course will focus on an extensive review of Algebra I. Topics studied will include linear and quadratic functions, polynomial functions, and operations with rational expressions. This course prepares the student for Geometry.

Prerequisite: Algebra I and placement in Geometry Honors.

Transition to Algebra II Honors – Session I only (*this is a non-credit, enrichment course*)

This course is designed for the above-average student that has completed Geometry, is recommended for Algebra II Honors, and would like enrichment to prepare for the course. The course integrates the basic principles of Geometry and Algebra. This course is designed to prepare the student for Algebra II.

Prerequisite: Geometry and placement in Algebra II Honors.

PHYSICAL EDUCATION

Behind the Wheel – Dates for driving are scheduled with the instructor.

Behind the Wheel has a fee of \$300.00.

This phase of driver's education is only available to those students who have completed a Driver's Education class and are students in the Lake Zurich School District. A State of Illinois learner's permit is required. Students must be at least 15 ½ years of age to enroll in the course. All students will spend a minimum of six-clock hours behind the wheel and three clock hours in observation (in compliance with state regulation). Students will be instructed in vehicle safety and in their ability to identify, predict, decide and properly react to various driving situations. **The dates and times for Behind the Wheel will vary and shall be scheduled with an individual Behind the Wheel instructor after the registration fee has been paid in the summer school office.** Students will be given priority for Behind the Wheel based on their birthdays and year in school.

Driver's Education Class – College Prep – Semester Course - Session I or Session II

This class will meet from 7:30 a.m. – 10:30 a.m.

The Driver's Education Class fee is \$100.00.

This class is only available to those students who will be sophomores or older. Students must be 15 by the first day of summer school class. Driver Education consists of thirty classroom hours of safe driving theory. Students will receive a State of Illinois learner's permit after successful completion of the class. After the classroom phase students will be eligible for Behind the Wheel during the upcoming Fall semester. Priority for Behind the Wheel will be determined by birthdays.

Illinois School Code, 105 ILCS 5/27-23, states:

- 1. All students are required to attend 30 clock hours of Driver's Education classroom. If a student, for any reason, fails to meet this attendance requirement they will be dropped from the class.***
- 2. All students must have received a passing grade in eight courses during the two semesters prior to enrolling in driver education.***

Health – College Prep – Graduation Requirement – Session I or Session II

****Students must have completed their freshman year in high school to enroll.***

This course will give students practical knowledge that will help keep them physically fit and mentally healthy throughout their lives. The course content is designed to meet the needs of today's students as they strive to live higher quality lives.

SCIENCE

Astronomy – College Prep – Semester Course – Session I only

Some night observations will be held, weather permitting.

Astronomy is an introductory course that covers the constellations, planets, stellar evolution, galaxies, our sun, the moon, life in the universe, UFO's, and cosmology. This course is recommended for those students who desire to learn some fundamental concepts of physics in a course that does not require the advanced math skill of the physics course.

**Students must have completed their freshman year in high school to enroll.*

Biology I – Honors – 1st Semester – Session I; 2nd Semester – Session II

Biology I is the study of living things and the life processes that are common to both plants and animals. The course covers topics from one-celled organisms through the most complex organisms focusing on their structures and related functions. Their classification, economic importance, and adaptations are studied. Laboratory units are taught from living materials or preserved specimens. Supplementary aids such as models, charts, and books are used to increase understanding of the subject material. This course integrates the basic principles of Biology I.

Physical Science – Honors – 1st Semester – Session I; 2nd Semester – Session II

Prerequisites: Biology CP (or higher) grade of "A" and Algebra I Honors grade of "B" or Algebra I CP grade of "A"

Open to students that will be sophomores or older.

This course covers topics of Physical Science, including chemistry, physics, and earth science. Physical Science is a skill-based course that uses scientific inquiry and laboratory investigations to teach the skills necessary for success in science. This course emphasizes science literacy through applied math as well as applied writing and research skills used in science. This is an intense course designed for highly motivated students with accelerated math, science, and reading skills.

SOCIAL STUDIES

Government – College Prep – Graduation Requirement – Semester Course – Session I or Session II

**Students must have completed their junior year in high school to enroll.*

U.S. Government is a one semester required course that examines the principles of our representative democracy by studying and being tested on the Declaration of Independence, the U.S. Constitution, the history and geography of Illinois, the Illinois Constitution, the flag of the U.S. and patriotism. This course also attempts to effectively prepare students for civic participation, voting intelligently and paying one's fair share of taxes.

ENRICHMENT, NON-CREDIT COURSES

The following non-credit course will meet for one week. This one-week course costs \$75.

Study Skills (June 13 – 16)

This one-week course will provide any student with the opportunity to review, refine and build the skills necessary to succeed in high school. Instruction will occur in the areas of time management, listening, note taking, test taking, reading for comprehension, communication skills, goal setting and building self-esteem.
